

Dec 4th is the second anniversary of the provincial government's Poverty Reduction Strategy. They promised to reduce poverty in five years. There are only 3 years left.

But People are STILL HUNGRY

On December 8th, help send an anniversary message to the provincial government.

Ask the government leaders: Why have they not raised social assistance rates when everyone agrees that the rates are much too low for people to live healthy and dignified lives?

Tell the government leaders: You want them to add a \$100 healthy food supplement to the cheques of every single adult receiving social assistance. You want a process for setting the rates that makes sense – so people can cover the real costs of living.

This is what the **Put Food in the Budget** campaign is all about.
